

If we reach this node  
there is a 2.8% probability  
that it is not skype, and a 97.2%  
probability that it is skype.

Take this path  
if there is < 1 packet  
with size 104.

There is a 0.6% probability  
that non-skype data will  
reach this node, and a 24.1%  
probability that skype data will  
reach this node
